Create tables in Hive and write queries to access the data in the table

AIM:

To create tables in Hive and write queries to access the data in the table.

PROCEDURE:

Installation of Hive:

1. Installing Apache Derby Install Apache Derby

10.14.2.0

https://db.apache.org/derby/derby downloads.html#For+Java+8+and+Higher

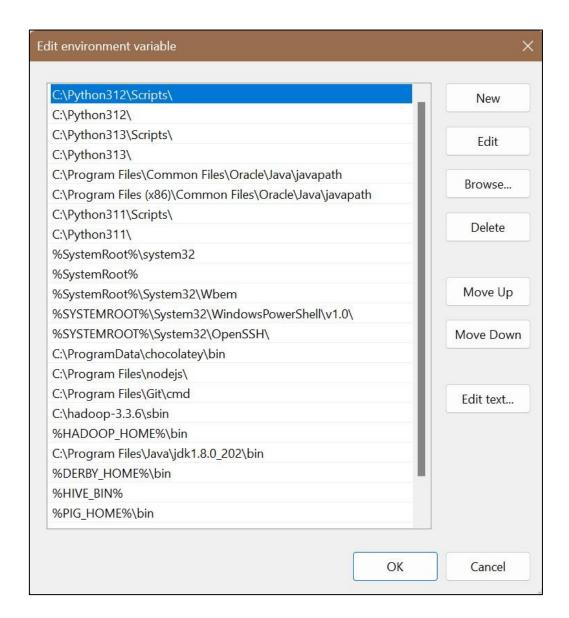

2. Downloading Apache Hive binaries

https://downloads.apache.org/hive/hive-3.1.2/

3. Setting environment variables

Variable	Value
HADOOP_HOME	C:\hadoop-3.3.6
HIVE_BIN	%HIVE_HOME%\bin
HIVE_HOME	C:\apache-hive-3.1.3-bin
HIVE_LIB	%HIVE_HOME%\lib

DEDDY LIONE	C/\db darby 10.14.2.0 bip
DERBY_HOME	C:\db-derby-10.14.2.0-bin

- 3.1. Copy Derby libraries we should go to the Derby libraries directory (db-derby-10.14.2.0\lib) and copy all *.jar files. Then, we should paste them within the Hive libraries directory.
- 3.2. Configuring hive-site.xml and Hive's Bin folder

Refer following link to download the file. Also download the guava file. Put hivesite.xml file to hive's conf location and replace hive's current guava file with this one in lib location. Also download the bin folder from link and replace the existing hive's bin folder. https://ldrv.ms/f/s!ArSg3Xpur4Grmw0SDqW0g44T7HYU?e=wDsoBn

- 4. Starting Hadoop Services start-all.cmd
- 5. Derby Network Server: Run the following command in separate window to open Derby StartNetworkServer -h 0.0.0.0

6. Starting Apache Hive

Go to Apache Hive's bin location with cd command and run the following command:

hive --service schematool -dbType derby -initSchema

7. Open Hive shell by typing:

hive

Create a Database:

Start by creating a database. Open the Hive CLI and follow the steps below:

1. Use the **CREATE DATABASE** statement to create a new database:

CREATE DATABASE sample;

2. Verify the database is present:

SHOW DATABASES;

3. Switch to the new database:

USE sample;

Create a Table in Hive

CREATE TABLE students (name STRING, roll INT, dept STRING);

Add Data

Run the **LOAD DATA LOCAL INPATH** command:

LOAD DATA INPATH

'/C:/Users/Jayar/OneDrive/Documents/DataAnalytics/Hive/students.csv' WRITE INTO TABLE students;

List Hive Tables and Data

To show all tables in a selected database, use the following statement:

SHOW TABLES;

To show table column names and data types, run:

DESC students;

To display table data, use a **SELECT** statement. For example, to select everything in a table, run:

SELECT * FROM students;

OUTPUT:

```
C:\hiwe

RESULT:

Thus to create tables in Hive and write queries to access the data in the table is completed successfully.
